

## INSTRUCTIONS FOR BUS DRIVERS

The Science Barge is located in downtown Yonkers, at the end of Dock Street on the Hudson River. We are located behind the Yonkers Train Station. The Train Platform is high enough for buses to safely pass under. Please see the following map. **This whole area is newly constructed and many of the streets do not correctly show on Mapquest, or Google Maps, or on your GPS. If you do want to run a search on Google Maps, enter 99 Larkin Plaza Yonkers, NY 10701. When you go under the Metro North underpass, follow the specific directions below.**

We are trying to be good neighbors, so if you could follow our route, we would appreciate it. As you approach the Science Barge (down Dock Street) please take a right on Alexander Street in front of the Apartments. Alexander is the first street you come to after you pass under the train platform. After going right on Alexander, take your next left (currently unnamed), and then your next left again. Proceed to the end of River Street (Note: River street is a new street not on many maps nor GPS systems). At the end of River Street is a small park where the students may safely exit the bus. This puts your door facing the Science Barge. There is no parking on River Street, and please plan on moving your bus as soon as the youth exit. This will prevent your bus from blocking the park and keep our neighbors happy.

**To Park.** Proceed left on Dock Street, and then left again on Alexander Street. There is ample street side parking down Alexander Street (near the Beczak Education Center). There are many bus companies in this area, so there is ample turning radius. You can also turn the bus around in the Beczak Environmental Center.

If you need directions during a school visit, please call 914-375-2151 and speak with someone in our office.
